User Stories and Test Scenarios

Sprint 1:

Story 1: As a driver, I want to be able to post rides, so that I can find passengers without having to individually contact riders.

Scenario 1: Create account - **Passed**

1. start SlugCruz app and enter information for login
enter:
“
UCSC Email
Create Password
Confirm Password
”
press sign up

or
sign in by clicking “Sign in”
“
Enter UCSC Email
Enter your password
”
press sign in
2. Account is created, and users are emailed verification email

Scenario 2: post rides as driver - **Passed**

1. Users toggled as a driver can move to the drivers tab
2. they can then post a ride by filling in the information fields for “from, to, date, time, seats, phone number”
3. press post

Story 2: As a UCSC student, I want to be able to get rides with other UCSC students so that I feel more safe with the people I am riding with.

Scenario 1: Accounts are authenticated - **Passed**

1. Emails entered into the sign-up and sign-in pages must be a @ucsc.edu email
2. verification emails are sent
3. users re-log into the sign-in page

Sprint 2:

Story 1: As a rider, I want to be able to choose a ride, so that I can find a ride without having to individually contact drivers.

Scenario 1: Riders can choose from list of posted rides - **Passed**

1. Users toggled as rider can navigate to rider page
2. Users can select and accept rides posted by drivers

Story 2: As a driver, I want to be able to choose a ride, so that I can find a ride without having to individually contact riders.

Sprint 3:

Story 1: As a rider, I want to schedule a ride with a destination, data/time, and frequency (e.g. weekly) so that I can plan my regular travel in advance.

Scenario 1: Riders can schedule a ride for a driver to choose - **Passed**

1. Users toggled as rider can navigate to rider page
2. Riders can fill in the fields “from, to, date, time, seats, phone number”
3. Riders can then post rides for drivers to pickup

Story 2: As a driver/rider, I want to be able to add my full name, college affiliation, and major to my profile so that the other person in the carpool can know who I am, making the ride feel safer and more trustworthy

Scenario 1: You can add name, college affiliation and major to your profile - **Passed**

1. Users navigate to the profile page
2. There are fields for name, major, and college which the user can fill in
3. The user then presses “save” to save their profile.
4. Their rides on the ride board should show their name as respective rider or driver
