

Sprint 2 Report

SlugCruz

Carpooling App

July 15th 2025

Actions to stop doing:

- The team wants to stop assigning more than 3 members to a single user story. To achieve this we can both break up user stories and assign team members to subtasks.

Actions to start doing:

- The team wants to adhere more to the SCRUM meeting format and adhering to 15 minutes because meetings can get a bit unwieldy at times.
- The team wants to be more proactive and spread work out more throughout the week, we made most of our progress this sprint on the weekend.

Actions to keep doing:

- The team wants to keep using pull requests (PRs) to update the Github Repository so other members can check each other's work and keep on top of new changes.
- The team wants to keep having people working on the same story and/or subtask meeting with each other outside of the team wide meetings to improve communication and progress further.

Work completed:

- Story 1: "As a rider, I want to be able to choose a ride, so that I can find a ride without having to individually contact drivers" [5]
 - Create system where riders can choose and be assigned to the rides that are posted by the drivers on the board.
- Story 2: "As a rider, I want to schedule a ride with a destination, date/time, and frequency (e.g., weekly) so that I can plan my regular travel in advance." [8]
 - Store those rides in the database and display them on the drivers tab
- Story 3: "As a driver, I want to be able to choose a ride, so that I can find a ride without having to individually contact drivers" [5]
 - Creating a separate drivers tab where they can post and choose a ride.
 - Create a notify feature where when a driver chooses, the riders get to know.

Work not completed:

- Story 2: "As a rider, I want to schedule a ride with a destination, date/time, and frequency (e.g., weekly) so that I can plan my regular travel in advance."
 - Create a schedule ride feature for riders just like post ride feature for drivers in sprint 1.
 - **Note:** work on drivers accepting rider post

Work completion rate:

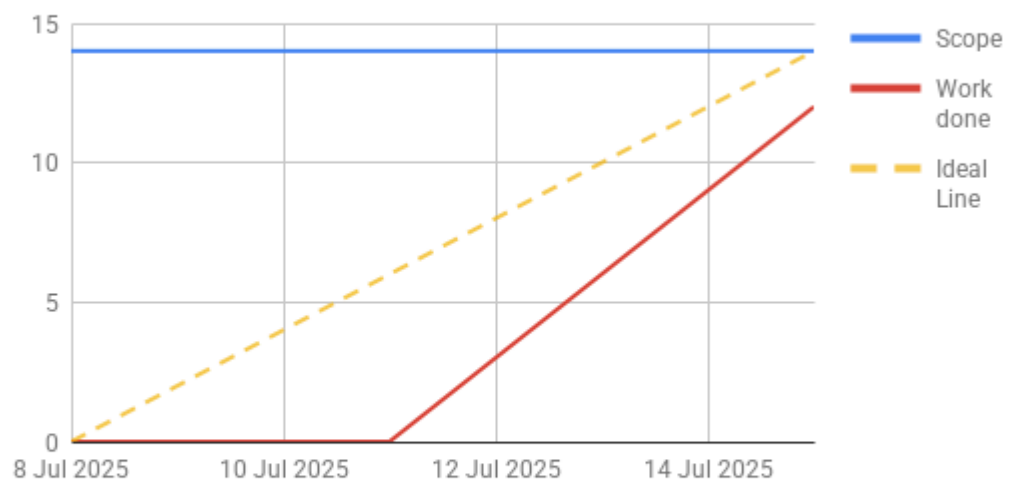

Number of user stories completed: 2

Number of estimated ideal work hours completed: 14 hours (3+5+6 in S1, S2, and S3 respectively)

User stories/day: 1/3

Work hours/day: 4
